# BACKPACK CARRYING SYSTEM

## FORESTPACK

**LIGHT ON YOUR BACK. STRONG IN THE FIELD.**

**ForestPack** is a professional backpack carrying system designed for wildland firefighting operations and interventions in hard-to-access terrain, where mobility, speed, and reliability are essential.

The robust aluminium alloy construction combined with an ergonomic carrying system ensures **high durability, stability, and maximum comfort** even during long-term transport of heavy equipment.

The carrying system enables safe transport of **ForestGuard 6, ForestGuard 12, ForestLine Bag** hose bag, hoses, and other accessories. Thanks to the modular strap system, the configuration can be easily adapted to current operational requirements.

# KEY FEATURES

- Strong and durable aluminium alloy construction (4 mm thickness)
- Ergonomic backpack carrying system for long-term comfort
- **Padded shoulder straps with Tebox** filling for maximum comfort
- Adjustable quick-release fixing straps
- High visibility thanks to fluorescent colour (RAL 1026)
- Modular attachment system for pumps, hoses, and accessories
- Full compatibility with **ForestGuard 6 / 12, D25-C42 fire hoses**, and **ForestLine Bag**

# APPLICATIONS

- Wildland firefighting
- Operations in difficult-to-access terrain
- Long-distance water and hose transport
- Rapid deployment of mobile pumping systems

# TEBOX – COMFORT WITHOUT COMPROMISE

The shoulder straps are equipped with modern 3D **Tebox** padding material, featuring **low weight, high breathability, and long-term durability**.

The material adapts to the body shape, effectively wicks away sweat, and significantly **reduces pressure on the shoulders even during prolonged load carrying**, ensuring maximum comfort during operations.

# TECHNICAL PARAMETERS

## WEIGHT

3,5 kg

## LOAD CAPACITY

30 kg

## EXTERNAL DIMENSIONS (W x D x H)\*

380 mm  
x  
380 mm  
x  
620 mm

## CONSTRUCTION

**Material:**  
Aluminium alloy  
(4 mm thickness)

**Surface finish:**  
Powder coating

## STRAPS

**Material:**  
Polyester

**Padding:**  
Tebox

\* Recommended for the design of vehicle storage compartments / transport boxes. Usable carrying width: approx. 350 mm. The height and depth of the transported load are not strictly limited – the load may extend beyond the upper and rear part of the carrying frame and is secured using the strap system.
